My Aircraft Reporting System

TRUST THROUGH **TRANSPARENCY**
TRANSPARENCY THROUGH **INNOVATION**
INNOVATION THROUGH **ADAPTATION**

MARS is an intuitive global Web Application designed for private aircraft owners, flight departments, and charter operators. **MARS** gives each aircraft in your fleet a micro-site where owners can view operational expenses, flight activities, charter revenue, and providing the ability to generate month end information on their aircraft's operation. It does not replace your current systems, but works in tandem with them. **MARS** is an innovative solution that saves aircraft management companies time and money while delivering the transparency aircraft owners so desperately desire.

Responsive Access

Impress current and potential owners by giving them access to their financial information whenever they want, wherever they are. Not only does MARS offer time saving convenience, but helps build a relationship built on trust and transparency.

Pain Points

You might face the following challenges:

- **Owner's concern about lack of transparency.**
- **Constant end of month billing inquiries.**
- **Tedious and wasteful month end reports.**
- **Maintaining a competitive edge.**
- **Creating a paperless environment.**

THE TIME IS NOW

Why delay in giving your clients what they want? Call us today and see how MARS can help.
